TRANSPORT CONVEYORS

Safeguarding Your Grain® Since 1957

Move Grain Efficiently and Safely

When months of hard work go into producing a grain crop, trust it to the best in grain transport conveyors: BROCK®.

You know BROCK® grain bins for their strength and durability in grain storage operations. But did you know that BROCK can help move your grain with a high capacity and safety-focused LeMar® Transport Conveyor? Plus, they back it all with Brock Grain Systems' BROCK SOLID® guarantee for trusted reliability. That's OneBrock™ OnePromise™.

BROCK SOLID is a guarantee of trusted reliability you can count on day in and day out. It's unmistakable quality, built to last year after year. And it's the same guarantee Brock was founded on back in 1957.

Today, dealers continue to uphold those standards, providing the superior service and support customers expect from Brock. BROCK SOLID means you can depend on them and Brock. Times may change, but Brock's solid values are stronger than ever.

Whether you're a farmer storing your own grain or a commercial operation entrusted with safeguarding your customer's crops, Brock Solid delivers. Always has, always will.

High-Capacity Transport Conveyors Focused On Safety and Performance

Brock's LeMar® High-Capacity Transport Conveyors deliver the industry's most safety-focused features plus pure driven workload to keep your operation running at peak performance. These conveyors are available in 15,000 and 25,000 bph (380 and 635 MTPH) capacity models engineered with the convenience of one-man operation and safety in mind.

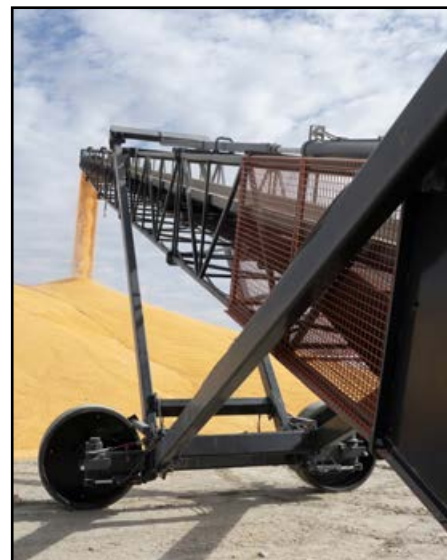

Each unit features a fail-safe hydraulic system including a hydraulically adjusted directional grain diverter, hydraulic height adjustability, hydraulic ramps that replace mechanical lifting and hydraulic drive wheels that allow easy movement to the next position.

This workhorse is designed for maximum efficiency when every minute counts. In addition, we've upgraded the hydraulic control system for enhanced performance and operation.

A long-lasting, slider bed belt design improves capacity, and 16-foot

Brock's LeMar® Transport Conveyor can pile grain to 38 feet (11.5 m) peak height and reach the middle of a 150-foot (45.7-m) wide bunker.

(4.9-m) drive-over ramps provide easier access.

The tail section keeps wheels out of the grain with no ballast. The conveyor is designed to travel sideways along the outside wall of the bunker.

Delivers Peak Performance

Brock's LeMar Transport Conveyor is designed and built from the ground up with proven results to deliver peak performance for your operation year after year. This Transport Conveyor is the foundation for your complete temporary grain storage solution.

Faster Unload for Faster Truck Lines

The LeMar Conveyor's double drive-over conveyor is designed to handle grain from one drive-over at a time. This allows staging trucks in two lines to eliminate inefficient stop-and-go time. As soon as one truck is empty, the next truck can open its hopper gate, reducing downtime between trucks.

Safety-Focused

Features the industry's most safety-focused features, like finger safe contactors and belt slippage monitoring.

Transport Conveyor Belt Slippage Monitoring

Safeguard your grain with Brock's Temporary Storage Aeration Wall

Drive-over unloading conveyors are available in single or double (shown) drive-over configurations

Deliver Convenience and Capacity with Commercial Quality

Brock's high-capacity, heavy-duty LeMar Transport Conveyor is built for performance with optional heavy-duty hydraulic ramps unlike anything on the market. This is commercial quality delivered at an economical price.

Designed for heavy-duty and high capacity (up to 25k bph) use, the transport conveyor drive-over features a heavy rectangular laser-cut tube frame and a low profile. With a low horsepower requirement, this portable grain unloading system is the most energy-efficient commercial grade Transport Conveyor on the market.

15,000 BPH Transport Conveyor (Single or Double Drive-Over)

- 36 in. (914 mm) wide main belt with hydraulic actuated main axle for side-travel.
- 42 in. (1067 mm) wide belt(s), self-propelled, side travel Drive-Over conveyor with extended ramps and hydraulic lift kits.
 - Main Conveyor - 50hp
 - Requires 150 amp main disconnect or portable generator size: 100kw (Not Included)

25,000 BPH Transport Conveyor (Single or Double Drive-Over)

- 48 in. (1219 mm) wide main belt with hydraulic actuated main axle for side-travel.
- 54 in. (1372 mm) wide belt(s), self-propelled, side travel Drive-Over conveyor with extended ramps and hydraulic lift kits.
 - Main Conveyor - 75hp
 - Requires 200 amp main disconnect or portable generator size: 200kw (Not Included)

Conveyors include hydraulics (with controls), electric motors, hydraulic motors, electric control panel (with amp meters) belt slippage monitoring, and directional grain diverter.

A Full Line of Brock Solid® Solutions

Storage

- EVEREST® & On-Farm Grain Bins
- EVEREST & Wet Holding Hopper Bins
- Temporary Storage
- Bin Access Doors
- Grain Aeration Floors

Handling

- Grain Sweeps
- Grain Conveyors
- Bin Unloading Systems
- Bucket Elevators
- Distributors & Accessories

Drying & Conditioning

- Cross-Flow and Mixed-Flow Grain Dryers
- Tower Grain Dryers
- Centrifugal & Axial Fans
- Heaters
- Controls

Structures

- Catwalks
- Bucket Elevator Towers & Stairways
- EVERLOC® Roof Mount System
- Support Towers
- Slot & Tab Construction

For decades, grain facilities of all types have counted on Brock for reliable, quality grain storage. That focus on providing dependability has led to product advances and expansion through the years, resulting in the full line of grain facility solutions that are available today.

Whether you're a farmer interested in grain storage or a commercial operator in need of temporary grain storage equipment, you'll find the quality you've come to expect and the trusted integrity you deserve.
