EVERLOC® WALKAROUND

Integrates seamlessly with Brock EVEREST® Bins

Safer Access. Smarter Design. Greater Confidence at the Peak.

Accessing the peak of a grain bin is one of the most critical, and traditionally one of the most challenging tasks in facility operation. The Brock EVERLOC® Walkaround system transforms this space into a secure, functional work platform, giving crews the confidence and stability they need to work efficiently and safely at height.

Designed to support modern safety expectations and real-world job site demands, the EVERLOC Walkaround provides a continuous, elevated workspace around the bin peak. The system enhances access to conveyors, towers, and roof components while creating a safer environment that allows workers to focus on the task at hand.

BROCK EVERLOC Walkaround is designed for an expanded walkway around the fill hole of:

- Approximately 12' (3.7 m) for bins 24'-60' (7.3-18.3 m)
- Approximately 18' (5.5 m) for bins 75'-105' (22.9-32 m)

Safeguarding Your Grain® Since 1957

BROCK® EVERLOC® Walkaround

Large, Functional Work Platform

The EVERLOC Walkaround creates a spacious work area at the peak of the bin, providing easy access to catwalks, and allowing multiple workers to operate comfortably at the same time. The wide platform and continuous walking surface provide ample room for inspection, service, and installation tasks.

Enhanced Safety and Ease of Access

Safety is the foundation of the EVERLOC design. Integrated galvanized handrails, toeplates, and stable treaded walking surfaces create a secure environment at elevation, helping crews feel confident and protected.

Retrofit-Friendly, No Roof Penetrations

Unlike traditional peak platforms that require complex engineering or roof modifications, the EVERLOC Walkaround is engineered for retrofit applications. The Walkaround can be installed on existing bins with an existing EVERLOC peak ring systems without requiring millwright modifications.

Intuitive Design and Efficient Installation

The EVERLOC Walkaround system is designed for straightforward assembly with common-sense components that fit together cleanly and efficiently. Its thoughtful engineering minimizes installation challenges and reduces fit issues.

Built for Long-Term Use and Daily Service

By providing a stable, protected workspace at the top of the bin, the EVERLOC Walkaround supports ongoing maintenance, inspection, and service activities. Workers can comfortably access equipment within the handrails and complete tasks without unnecessary risk.
